

KELLUU

Continuous aerial surveillance or inspection

Kuopio 2022

Continuous aerial surveillance or inspection is nowadays difficult.

- Expensive
- "high" flight altitude
- Non ecological
- Heavily regulated
- Noise pollution
- Non-Scalable
- Long delivery time

- Short flight time
- Easily affected by the weather
- Low payload
- Limited flight area

Data flow

Data delivery in seconds

Flight control

One pilot controls dozens of ships
